1) Start-up type tested: - 40°C, possible at nominal voltage with load deration.		
Notes: - Technical parameters are typical, measured in laboratory environment at 25°C at nominal values, after minimum 5 minutes of operation. - Power rating, losses, efficiency, ripple, thermal behaviour and start-up may change outside of the nominal rated input range. Contact factory for details. - Data may change without prior notice in order to improve the product.
